CIVIL & MARINE INFRASTRUCTURE

OUR COMMITMENT

CivilPlus Constructions Pty Ltd is a dynamic, modern, and progressive Townsville company operating since 2004 with expertise in Civil and Marine Infrastructure Sector.

The goal of the company has been to not only take on traditional civil and marine projects, but to provide an avenue for clients who require multifaceted construction expertise on unusual or highly technical civil and marine projects.

Now in its 17th year of operation, CivilPlus has cemented itself as an organisation that delivers quality results and meets or exceeds client's expectations through the delivery of innovative construction methods and win-win partnerships.

CivilPlus is committed to providing excellence in civil construction and associated services that consistently results in achievement of our community and legislative requirements regarding a healthy and safe workplace and the protection of the environment.

CivilPlus' Corporate logo incorporates its fundamental value that "Our Clients are Our Future" which is why your experience with CivilPlus will leave you with a confidence that you have reached a new service and delivery benchmark in the construction industry.

We look forward to building a strong partnership should you choose to engage our services.

"OUR CLIENTS OUR FUTURE"

CAPABILITY

The business is in Townsville, QLD and can be readily mobilised to service remote, metropolitan, or localised urban areas, as well as coastlines of Northern Queensland, Western Queensland and as far as the Northern Territory.

CivilPlus has completed small, medium, and large projects, which provides a wide scope for all clients looking for a reputable construction company to complete work on their projects.

We have an established team of experienced Managers, Supervisors and Personnel who have repeatedly completed complex multi-million-dollar projects ahead of program and budget to the satisfaction of all stakeholders.

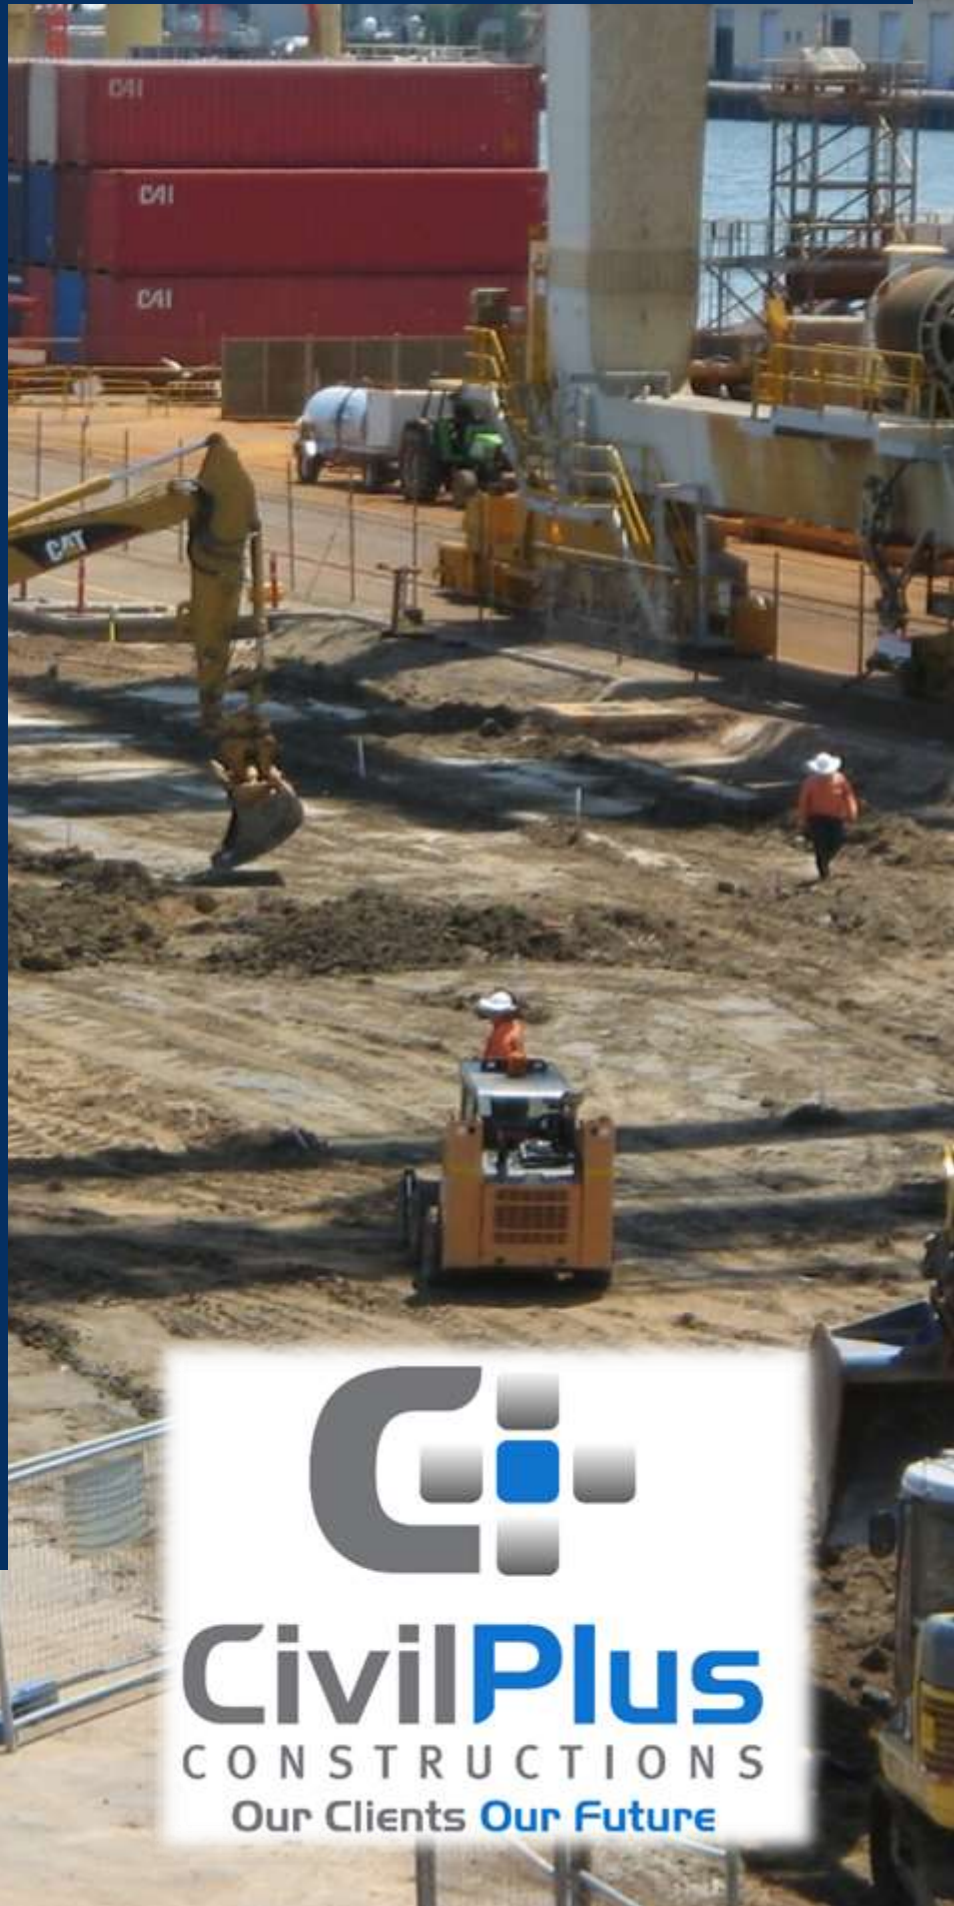

CivilPlus have an extensive list of modern plant equipment and attachments for all types of civil and marine constructions. All plant and equipment are meticulously maintained and can be supplied with its full service and repair history which will provide peace of mind when it comes to reliable plant that meets WHS & Environmental Legislation.

CivilPlus has a large expertise base which allows a fluent and consistent work program to be executed. This consistency allows the process of project administration/management to be streamlined resulting in less stress and reduced overheads for our clients.

CONSTRUCTIONS
Our Clients **Our Future**

CERTIFICATIONS & LICENCES

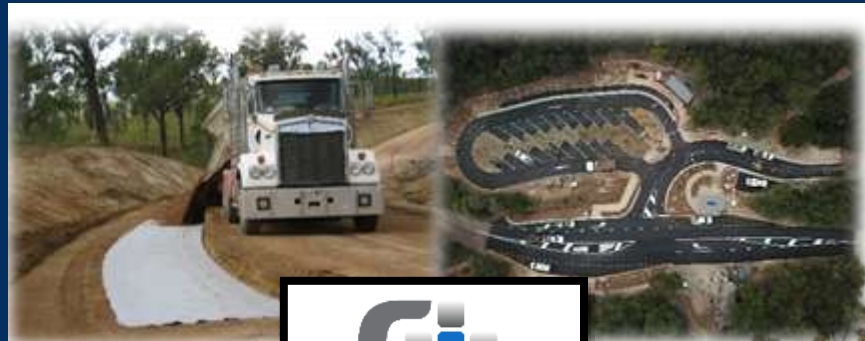

PIPEWORKS

CivilPlus have extensive experience in pipeline and pump station constructions having completed many large and small installations within the Townsville area. These pipe installations have involved MSCL, DICL, Steel, Stainless steel, PVC, HDPE, GRP and Concrete RCP's & RCBC's in extremely difficult geological land and marine based environments. CivilPlus has a fierce reputation for its fast breakdown support and its quality work in water infrastructure services.

EARTHWORKS & PAVEMENT WORKS

CivilPlus have an experienced and diverse team of Project Managers, Supervisors and Ground Support that have completed significant bulk earthworks, civil structures, and designed pavements. Clients have included BHP, Dept of Transport & Main Roads (DTMR), Port of Townsville, the Australian Defence Force / Serco Sedexo / Spotless, QPWS & many Regional Councils.

DAM WORKS

CivilPlus has completed the refurbishment of the Gleeson's, Aplins & Blacks Weirs located in Townsville to meet new legislative specifications for weir/dam structures. These projects included lowering weirs water lines to acceptable levels to complete the works, demolition of parts of the existing structures, cast insitu bored piers, formwork and reinforcing for mass concrete pours.

BRIDGE & CONCRETE CONSTRUCTION

CivilPlus Management & Supervisors have completed numerous bridge projects during their careers. Aspects of experience are all substructures and superstructures including driven piles and cast insitu piles, precast and insitu headstocks, abutments approaches and pavements.

These mostly remote locations have required exceptional planning and execution to ensure the outcome as per the contract for clients such as Townsville City Council and Stanwell Limited.

BOAT RAMPS

CivilPlus has extensive experience with boat ramps, which includes sub grade preparation, precast concrete panels, insitu concrete, rock protection, piling, gangways, pontoon installation and dredging.

Works have been completed for clients such as Department of Transport & Main Roads (DTMR), Australian Institute of Marine Science (AIMS) and numerous Regional Councils in Far North Queensland.

PILING WORKS

CivilPlus has the resources to complete all Piling works associated with new bridge / wharf and jetty constructions as well as sheet piling for coffer dams or other structures requiring permanent or temporary support. CivilPlus has an 80tn crane with a range of vibro hammers / drop hammers and augers to suit your design and environment.

Excavators from 5tn to 36tn that can adapt to augers ranging in size from 200mm – 1200mm and vibro hammers are also available for piling works. CivilPlus has a 320DL Excavator with a Lodrill configuration, which can allow boring up to 18-20mtrs without the expense of mobilizing and hiring of a specific drill rig.

Works have been completed for clients such as the Department of Transport & Main Roads (DTMR), Regional Councils, Lend Lease and Thiess.

LIGHTHOUSE CONSTRUCTION & REFURBISHMENT

CivilPlus have completed works for clients such as Australian Marine time Safety Authority (AMSA) to ensure the continued operational integrity of their Aid to Navigation Light Houses located on the remote coastlines of Australia. These projects have required effective remote site planning and execution of DERM permits to ensure critical contract outcomes. During these types of projects innovative ideas such as the use of heavy lift helicopters for licensed demolition and constructions, have provided economic benefits to our clients while reducing major environmental impacts to these sensitive environments.

REFURBISHMENT OF MARINE STRUCTURES & DREDGING

CivilPlus has the resources to complete all aspects associated with new wharf/jetty constructions or refurbishments whether constructed from steel, timber or concrete. Also offered is DERM compliant blasting and painting of metal structures and installation of required services.

CivilPlus have completed dredging projects since 2009 and can provide a solution for your needs. Dredging can be completed either using floating suction cutter dredges or plant such as amphibious or barge mounted excavators. All works are completed to the strict environmental conditions as required by authorised permits.

Works have been completed for clients such Australian Maritime Safety Authority (AMSA), Australian Defense Force (ADF), Serco Sedexo, Spotless, Port of Townsville, and the Department of Transport & Main Roads (DTMR).
